

ARTIFICIAL + HUMAN
INTELLIGENCE

CLEARER DECISIONS

RIViRTM

Program integrity solutions
created by program integrity people

Qlarant.com/RIViR

THE CLARITY OF AI

Introducing a powerful platform that simplifies your workflows.

Gain insights, make better decisions, and work smarter with RIViR. RIViR brings your risk identification, visualization, and resolution efforts together into a single, easy-to-use solution that streamlines workflows. With RIViR, you can pull data from disparate sources—including on-premise and off-premise—into one data stream that populates multiple data sets. Then follow the flow of data to efficiently identify, visualize, and resolve fraud. RIViR's advanced AI, machine learning, predictive modeling, and proprietary Nerdy Algorithms™ modernize your program integrity operations.

“*RIViR provides a modern technology solution that adapts to your unique needs, backed by the knowledge of subject matter experts with real-world experience in program integrity.*”

—Will Mapp, III, Chief Technology Officer

THE WISDOM OF EXPERIENCE

Built by experts with roots in program integrity.

RIViR combines the right technology backed by the right people. Our team of 200 subject matter experts, analyze data, discover potential vulnerabilities, and recommend courses of action to mitigate risk. With 82 data and claims analysts, 12 PhD data scientists, and more than 100 skilled fraud investigators, we can address all aspects of these risks—potential or confirmed—and provide meaningful solutions.

Strengthening program operations and improving performance require a strategic mindset, critical thinking, and a passion for program integrity. RIViR brings together the industry's most advanced data analytics and artificial intelligence with 45 years of hands-on experience and expertise in fraud, waste, and abuse. RIViR offers this unique combination of “street smarts” and leading-edge technology.

“*I understand the challenges faced by program integrity leaders—I've been there. Our human intelligence turbocharges RIViR's artificial intelligence and that's what sets us apart.*”

—Holly Pu, Vice President, New Product Development

RI Risk Identification
Expose risks before they become problems.

The Risk Identification module gives you access to Qlarant's proprietary Nerdy Algorithms™—configurable, customizable libraries of risk factors—that analyze your data for potential FWA.

Vi Visualization
Bring your data to life.

The Visualization module provides quick, easy-to-view summaries of each program's status. Charts, maps, and graphics uncover patterns in the data to pinpoint potential risks.

R Resolution
Take action—confidently

The Resolution module translates your information into guided workflows, identifies courses of action, and prioritizes tasks—helping you make clearer decisions and work more effectively and efficiently.

RIViR FITS YOUR WORKFLOW

Chart your way with RIViR.

We work with you to assess your requirements, and then put together a solution that precisely fits the way your program works—so you get everything you need and nothing that you don't.

- **Data Hosting:** Host at your site, offsite, or on Qlarant's servers.
- **Algorithms:** Use our Nerd Herd™ library of algorithms or your own. We can also generate custom algorithms or AI models based on your requirements.
- **Access/Licenses:** Only pay for the roles you need. Roles can be tailored to the technical literacy of your users.
- **Training:** We offer training onsite at your organization, offsite, or at any location that's most convenient for you. A one-time, 8-hour in-person basic training session and user manual is included in your license agreement. Customized or virtual training are also available.
- **Support/Help Desk:** Three levels of support are available depending on your needs.
- **Consulting & Professional Services:** Our expertise is available on demand. Whether you need an on-loan data scientist, technical expertise for data integration, software engineers for troubleshooting, or subject matter experts to better understand policy implications, our professionals are standing by to support your organization.

“*We have combined the ‘book smarts’ of AI and our analysts with the ‘street smarts’ of our investigators to create one beast of a program integrity tool. Unleash the beast!*”

—Ronald G. Forsythe, Jr, PhD, Chief Executive Officer
